

Social Media Feature

Look up a story

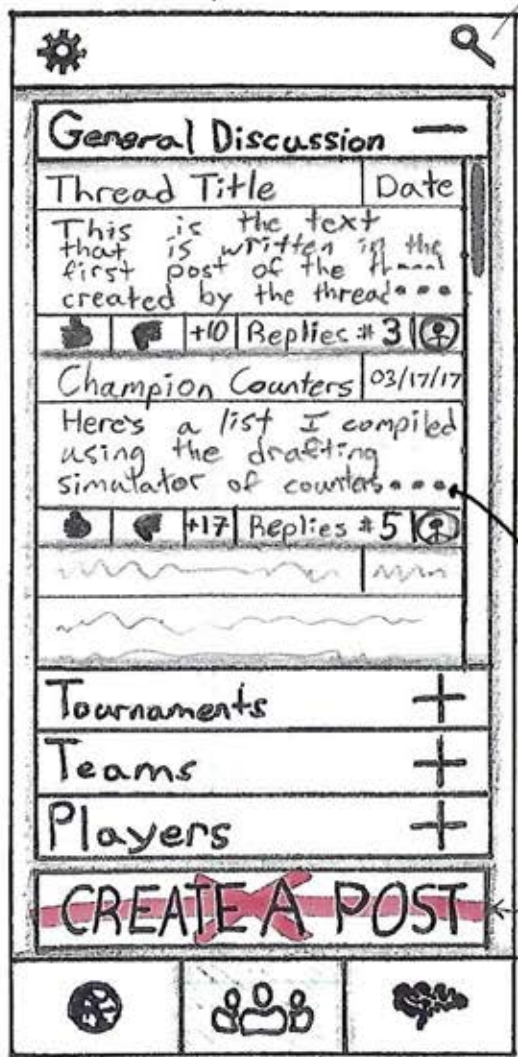

Pull down from top to refresh. Content gets pushed down temporarily.

Media Source Logos

Pressed/Activated

Default

Community Forum Feature

Look up a topic

When one section expands the others collapse.

Team Initials and Insignia

"..." is a button that expands the discussion

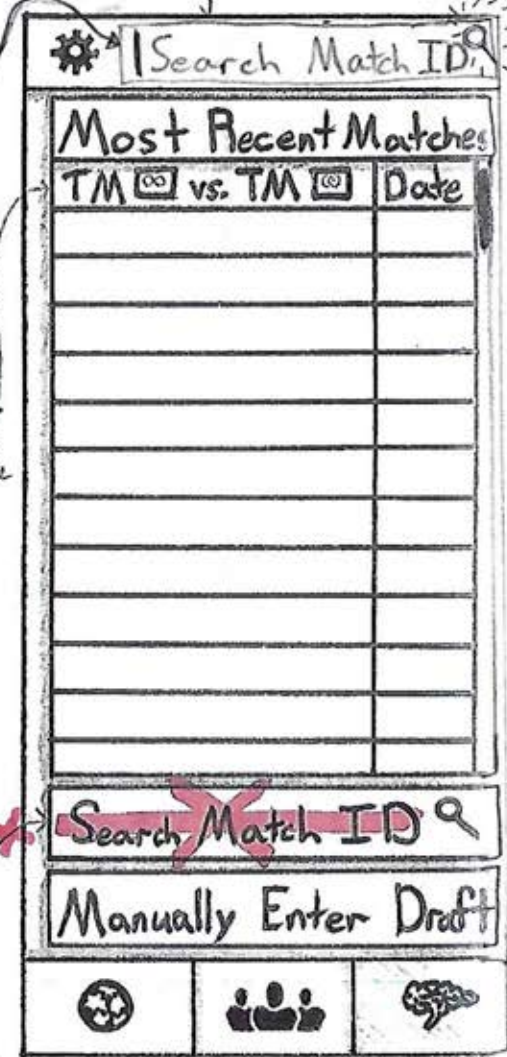

Pressed/Activated

Default

Use a sticky icon instead

They could be dragged out of the way and repositioned like facebook chat bubbles.

Drafting Simulator Feature

Pressed/Activated

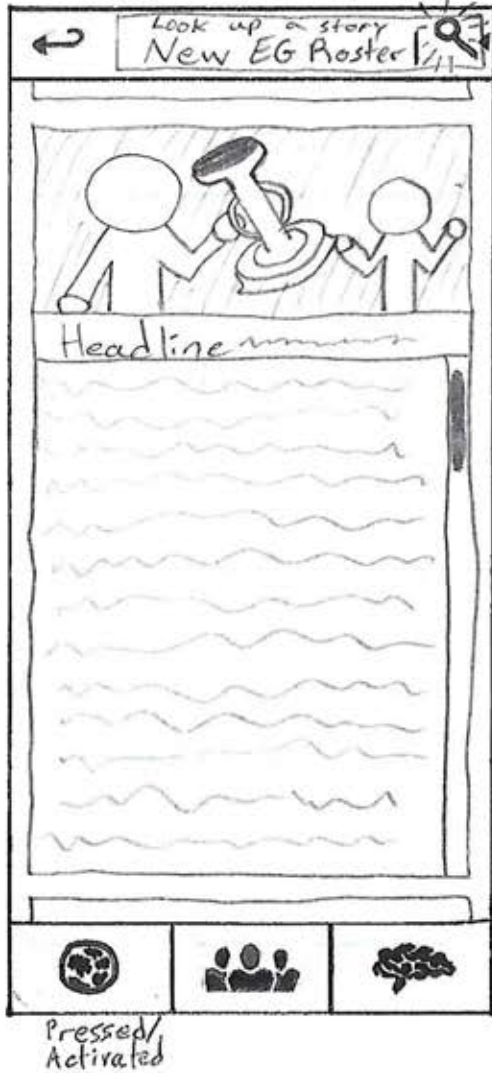

Default

Search Match ID
123456789

Insertion Cursor Placeholder Text shrinks and stays visible at top of search bar.

1 step away from main pages

User selects story to expand its info.
Social Media Feature

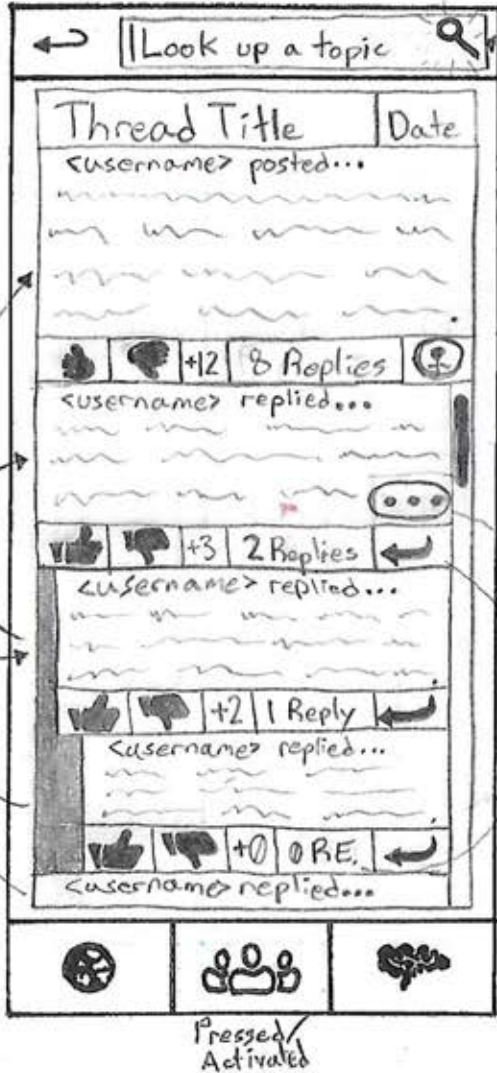

This is what the search function looks like when the icon is pressed. The transition is faded in.

User can still scroll to other stories, but only one can be expanded at one time.

The top left back button would return to the social media main page with no stories expanded.

User selects discussion to expand it.
Community Forum Feature

Champion selected here. User can filter the list by searching in real time.

When a user first presses the search icon, the description text appears as a placeholder until something is typed and the description text is shrunk and moved up like the previous text.

read more button

reply button

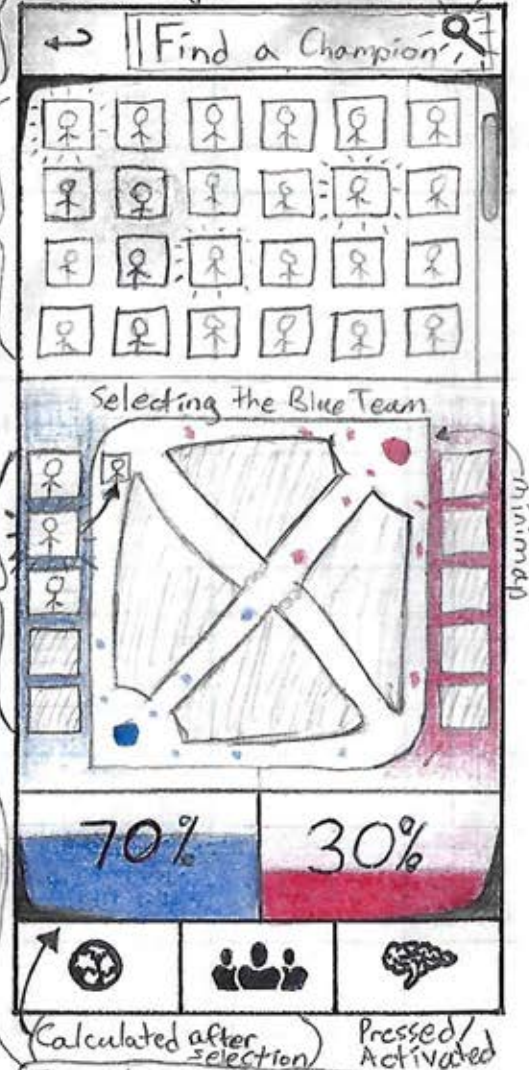

The counter fields shrink as needed.

ONLY one reply can be expanded at one time if the read more button is pressed.

Posts/replies can adjust their height depending on how much text is inputted, but there is a character limit.

that triggers a read more option to appear

User selects to manually enter match up drafts.
Drafting Simulator Feature

(Calculated after selection) Pressed/Activated

The champions SELECTED shown on the sides are filled in Top to Bottom, blue first and red second. User can drag champions to position them and make prediction more accurate

☀️ means option pressed

1 Step away from Main Pages

"Searching"

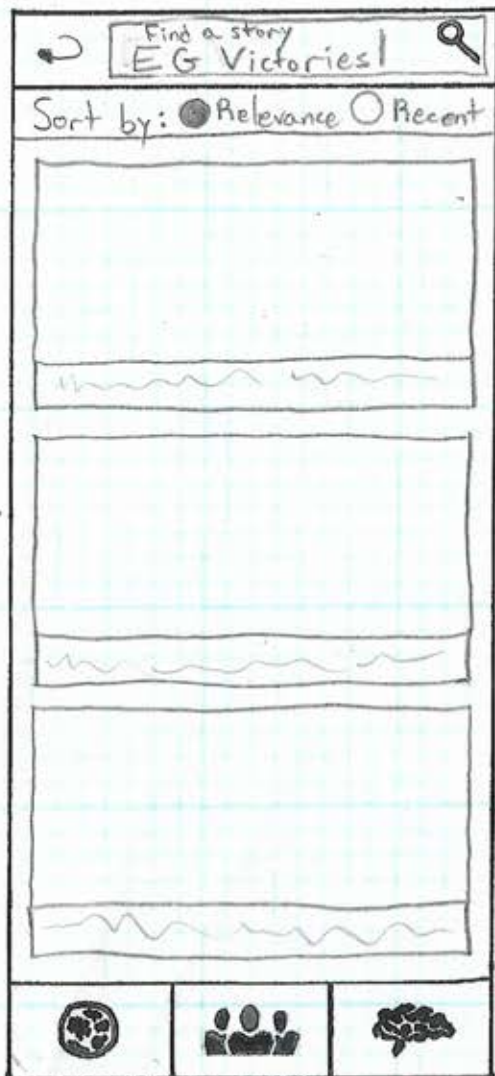

User looks up a topic.

Community Forum Feature

User looks up a story
Social Media Feature

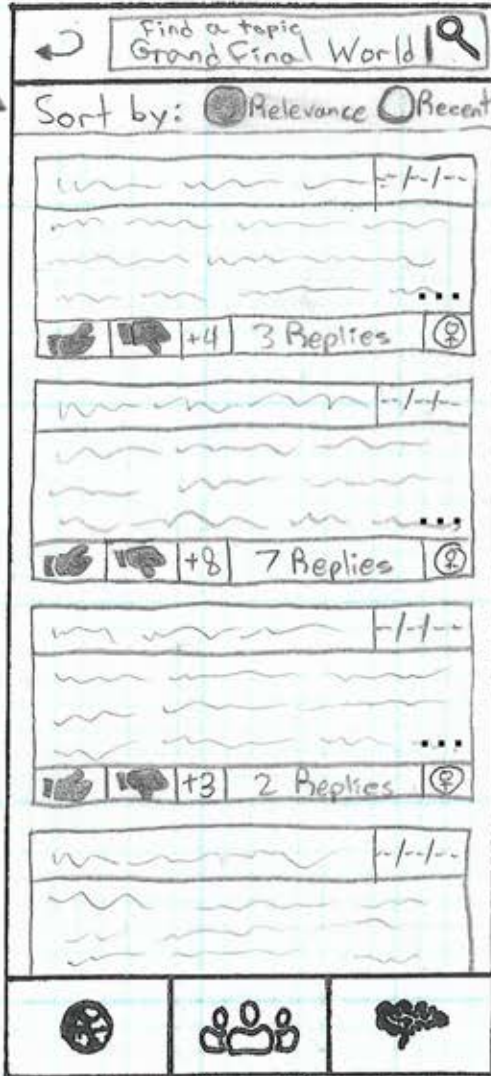

This page will look very similar to the page the user is led to from choosing a match on the most recent match list.

User looks up Match ID
Drafting Simulator Feature

Pressed/
Activated

By default search results are sorted by relevance but the user can choose to get most recent results.

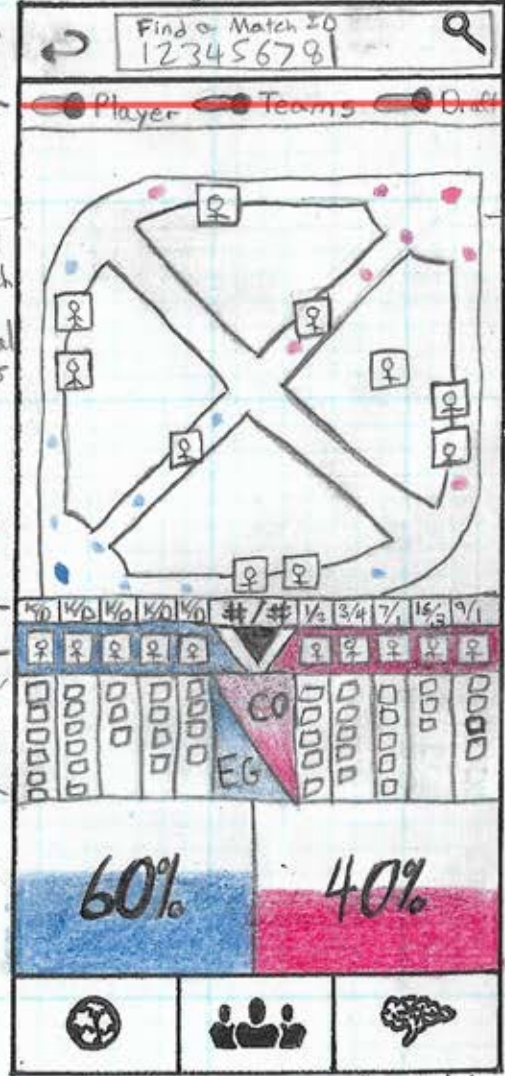

Pressed/
Activated

~~stats to consider~~
The toggles can be accessed in the settings page from the gear icon on the main page too. If the match looked up is not professional then the toggles will not be shown since only draft statistics can be considered.

Score & K/D/A

Team Picks

Teams & Items

Pressed/
Activated

"..." is a button that expands the discussion

Every match is assigned a unique ID number so looking an ID up should yield one result or none at all.

The favorites chosen in each selection grid effect the next list of potential favorites chosen by the user.

Settings for each feature:

Social Media Feature

Pressed/Activated

Make expanding sections for this like forum page.

A user can search for players, teams, tournaments to favorite. Community Forum Feature

User types a country name and a list drops down below that suggests countries in real time based on what they type.

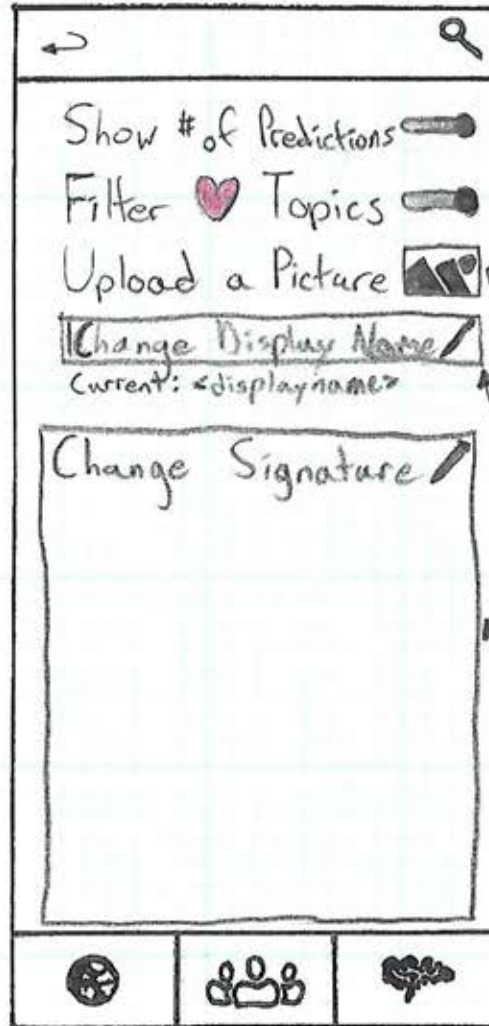

User selects favorite teams by seeing their team insignia and team initials.

When a team is selected a red heart appears below the team insignia.

User selects favorite players by seeing their headshots and game names.

User selects favorite tournaments by seeing trophy and name. Maybe country flag instead of trophy.

User selects social media sources preferred by seeing logos.

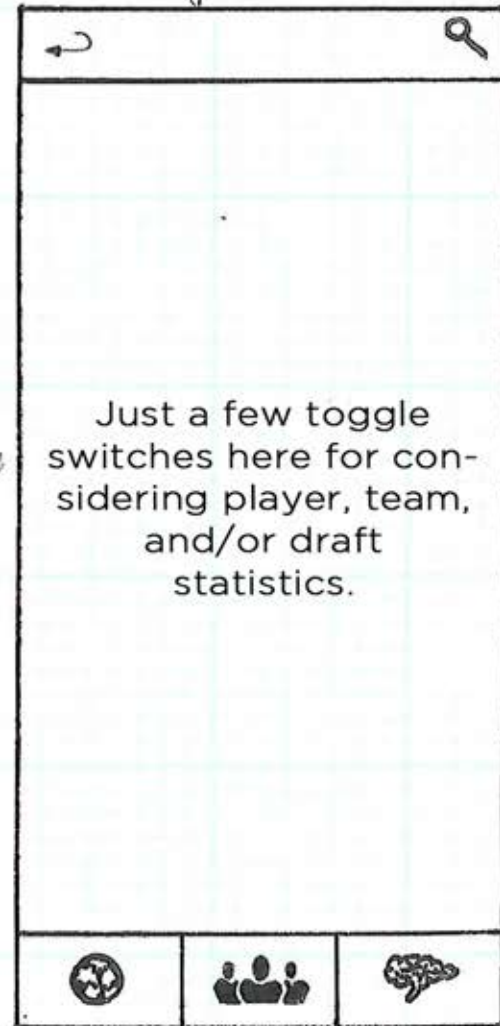

Pressed/Activated

User is taken out of the app to select their profile picture.

User can change their public display name, which is just their username by default.

User can change what goes below each of their posts, but not replies (to avoid cluttering).
