

User Stories and MVP Features for Tome eSports

Goal

Reason

Onboarding Process Feature

As a user, I want to see a tour of the application before I start using it,	so I can have a better idea of where all my options are.
As a user, I want to select my favorite teams/players from a list of suggestions,	so I can pick the highest ranking teams/players sharing my nationality.
As a user, I want to be introduced to the Social Media Feed, Community Forum, and Drafting Simulator in that order	so I can learn how to be engaged first, participate second, and be more insightful last.

Login with Social Media Credentials Feature

As a user, I want to log in with my social media credentials,	so that I can minimize time spent registering.
As a user, I want to type in my gmail user name,	so I can log in with out creating a new username.
As a user, I want to type in my password,	so I can log in securely.
As a user, I want to click save,	so the application knows who I am next time.
As a user, I want to log in this way each time,	so I don't have to reconfigure how I log in next time.
As a user, I want a "Remember me" check box option for my device,	so I don't have to recall my password on my primary device.

eSports Social Media Feed Feature

As an eSports fan, I want to click on a visually obvious button on the navigation bar for social media,	so I can return to this page and get engaged with the most recent eSports news.
As an eSports fan, I want to change the settings controlling the content of my social media feed,	so I can cater the content to my interests.
As an eSports fan, I want to change how my content settings options are organized,	so I can specify if I am more interested highest ranked professionals or amateurs.
As an eSports fan, I want to change how my content settings options are organized base on my nationality,	so I can specify further if I am more interested highest ranked professionals or amateurs sharing my nationality.
As an eSports fan, I want to select my favorite teams from a suggested list considering my previous settings,	so I can recieve updates/notifications for teams I'm proud of or admire the most.
As an eSports fan, I want to select my favorite players from a suggested list considering my previous settings,	so I can recieve updates/notifications for players I'm proud of or admire the most.
As an eSports fan, I want to select my favorite tournaments from a suggested list considering my previous settings,	so I can recieve updates/notifications for tournaments consisting of teams/players I'm proud of or admire the most.
As an eSports fan, I want to select my preferred social media applications,	so I can choose where the updates/notifications of my favorites are coming from.
As an eSports fan, I want to check a box to include official developer announcements,	so I can keep up with how the game is changing and consider how it may effect the eSports scene.
As an eSports fan, I want to have my settings saved automatically,	so I don't have to reconfigure what content I would like to see.
As an eSports fan, I want to land on the social media feed,	so I can be engaged immediately with content now catered to my interests.
As an eSports fan, I want to recieve the newest and active updates considering my previous settings,	so I can see the most up-to-date information descending and keep up with relevent news to present time.
As an eSports fan, I want to swipe down to refresh the news feed,	so I can easily see if there has been any very recent eSports news updates.

eSports Community Forum Feature

As an eSports fan, I want to click on a visually obvious button on the navigation bar to enter a forum page,	so I can share my eSports related thoughts and opinions with the rest of the community and listen to others.
As an eSports fan, I want to choose a subsection of forum threads,	so I can narrow down the types of discussions I'm looking for.
As an eSports fan, I want to see the most recently active threads/discussions on the appropriate subsection,	so I can see what discussions are being started or continued in descending order and stay up-to-date.
As an eSports fan, I want to create a new thread in the appropriate subsection,	so I can discuss something that hasn't already been discussed.
As an eSports fan, I want to comment/reply on an existing thread,	so I can participate in a discussion another user has started.
As an eSports fan, I want to click on a button for accessing my community profile settings,	so I can personalize how other users identify with me.
As an eSports fan, I want to access my community forum inbox,	so I can stay updated on who else is interacting with me.
As an eSports fan, I want to toggle an option to show the amount of correct predictions I've made,	so I can brag and boost my credibility within the community.
As an eSports fan, I want to click on a button for accessing my community forum settings,	so I can personalize how the forum is organized to cater it to my interests.
As an eSports fan, I want to toggle an option to only view discussions involving my followed favorites,	so I can only observe and discuss what I care most about.

Match-Up Drafting Simulator Feature

As an eSports fan, I want all the functions of this feature enabled by default,	so I can get the best calculated odds for a match-up test.
As an eSports fan, I want to select from a list of most recent matches with my followed favorites,	so I can research the odds of the match-ups I care most about.
As an eSports fan, I want to enter a Match-ID,	so I can check specific match-up odds such as my own.
As an eSports fan, I want to toggle an option to turn off followed favorites from the suggested list,	so I can check the newest matches regardless of who is in them.
As an eSports fan, I want to change the functionality of this feature with a few toggle options,	so I can customize the kind of odds calculated.
As an eSports fan, I want to toggle an option to consider player performance stats,	so I can see how individual performance effects the match-up odds.
As an eSports fan, I want to toggle an option to consider team vs team stats,	so I can see how the statistics of two specific teams facing each other in the past can effect the odds.
As an eSports fan, I want to toggle an option to consider character drafts,	so I can see how the character picks made will have an effect on the match-up odds.
As an eSports fan, I want to manually input drafts without referencing a match,	so I can see what the odds of a match are before it happens only based on draft.
